

Lublin University
of Technology
Library

biblioteka.pollub.pl

LUT Library is the biggest centre of the scientific and technical information in the region. Functioning of the library is based on over 60-year-old tradition of the support of LUT's didactics and research. The library takes part in LUT's academic tasks. It provides the users with information sources and supports the university in the scope of evaluation. Moreover, the library operates the publishing activity as LUT Publishing House.

At LUT Library you can:

read
browse

study

spend time

ask for information

work in groups

use the Internet

print

use your laptop

LUT Library's Mission

The mission of the library focuses on the creation of the proper set of research and tools adjusted to the changing needs of students as well as the academic and didactic staff of LUT. The library provides access to the latest Polish and foreign resources of the scientific information, according to the academic disciplines and the university curriculum. It is also responsible for the didactic, informative and documentary activity thanks to the complete use of the available technological tools.

LUT Library's Strong Points

- The biggest library collections of technical sciences in the region
- Constantly updated collections based on the changing needs of educational profiles and scientific research
- Digital Library with the latest publications of LUT's academics
- LUT Library's website is a „gate” to the scientific information
- Information about training programmes for LUT's students and academics
- Location in the centre of campus
- Adapted for people with disabilities
- Use of the integrated library system which operates most of LUT Library's processes
- Cooperation with the academic libraries in Poland
- Professional Library Staff

LUT Library's Collections and Use

Printed LUT Library's collections are situated at the Circulation Desk and four branch circulation departments. Information about the complete LUT Library's collections is available in the computer catalogue of our library. Our collections are also visible in two online library catalogues: NUKAT- Polish National Central Catalogue as well as in WorldCat- the global catalogue of library collections. Moreover, in Databases tab on LUT Library's website (biblioteka.pollub.pl) users can find electronic books (IBUK service, books published by Elseviere, Springer, EBSCO), basic and full text databases of leading international electronic journals (such as ScienceDirect, EBSCOhost, IEEE Xplore, Wiley Blackwell), bibliographical databases (SCOPUS, Web of Science) as well as open access databases (BazTech, BazEkon, DOAJ, Hindawi).

In addition to this, LUT Library establishes searching databases and tools- Digital Library, Publications of LUT's academics and a journal search engine InfonaNet. Digital Library deposits mainly the collections of LUT's publishing houses, doctoral theses, descriptions of LUT's patents, and branch standards. LUT academics' Publications Database not only informs about the publications but also serves as a bibliometric tool. Journal search engine- InfonaNet facilitates access to the printable and electronic journals subscribed by our library. LUT's staff and students are also provided with access to multisearch engine, which is available on the website. Thanks to EDS, users may simultaneously find the majority of resources' descriptions from LUT Library's catalogue, LUT Digital Library, licensed databases and Open Access resources. Electronic collections subscribed by LUT Library are shared in LUT's computer network and on private computes*, after logging on the library's website and search engine's configuration (proxy server).

Rules of borrowing, renewals and returns of the library materials are described in „Regulations of sharing library collections and rules of the user service in LUT Library”.

Access to all LUT Library's services is available for LUT's academics and students as well as for the staff of other academic institutions in Lublin. The other users are asked to legitimate with their ID Card. Whereas on-site use of collections is free of charge for the other users, in order to apply for a library card which provides checking out, they are asked to leave a deposit.

The electronic ID student card functions as a library card. After logging into the online catalogue, the users can check their library account, order a book, or prolong the loan period.

The use of LUT Library's collections and service is free of charge, except for the copying fees and overdue fines.

*This option is available for users with an active library account. In order to log in users are asked to give the number of a library card/ student ID and a password.

Students can find information in a special tab called „For Students”, which is visible on the main website. It contains instructions, schedules, sources of knowledge, and training materials. The tab „For Science” includes information concerning the methods of literature research, copyright law, parametric assessment.

LiveChat service (available during the opening hours) provides users with the direct contact with the librarians.

LUT Library's Structure and Organization

User Services Department

Circulation Desk

room 303
phone: +48 81 538-4366
e-mail: wypożyczalnia@pollub.pl

Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
8-18	8-18	8-18	8-18	9-15	9-14

LUT's Circulation Desk is a place where users can collect and return the books which were ordered. The collection of books available for checking out includes over 100 000 items of the scientific literature, technical course books, language literature and specialized literature consistent with LUT's profile.

In addition to this, the foreign students may find help at the Library Help Desk, where they are informed about the rules of library search and collections.

Inter-Library Loan

room 303

phone: +48 81 538-4366

e-mail: wypmb@pollub.pl

Inter-Library Loan provides access to the external materials according to the following rules:

- Loans from Polish libraries - if they are not located in Lublin libraries
- Loans from the foreign libraries - if they are not located in Polish collections

Users can order the materials at the Inter-Library Loan desk, by e-mail or by filling in the form available on the library's website. LUT Library collections are also available to order by other partner libraries.

Only LUT's academics and students are permitted to make use of the Inter-Library Loan service.

Student's Room

The student's room is located at the Circulation Desk. It is available for the individuals and groups. The student's room is equipped with 12 stationary computers, 40 seats, a video projector, speakers and 4 screens for silent studying. The users of the student's room are also provided with access to Eduroam network.

Branch Libraries:

Four branch libraries, located in the faculty buildings, provides users with free access to the collections in subject order. On-site loans are available for all users. LUT's students and academics can loan library materials for a short period, but some materials do not circulate.

Internet users are provided with the stationary computers and Eduroam (wireless Internet connection available at LUT's campus) for their own laptops and other mobile devices. Eduroam requires registration in Eduroam network.

The users of branch libraries may receive help at information desks. The librarians provide assistance in finding resources for the research and teaching. They also provide training for groups and individuals. The librarians document scientific records of LUT's academics as well as organize seminars and training for students.

The main tasks of Scientific and Technical Information Department include scientific and standardization information, didactics, the support of LUT's evaluation process and the library's promotion.

Services of Scientific and Technical Information Department:

- information service of LUT's staff and students
- bibliometric and scientometric analyses
- access to standards and standardization
- co-creation of bibliographical and information databases
- LUT Library's website editing
- organization of exhibitions, displays, presentations

In the student's room of Scientific and Technical Information Department there is the reference collection of technical books, language course books as well as different technical, scientific and branch journals.

65

5

over 20 000 items

In Scientific and Technical Information Department there is also a seminar classroom. It may be used for silent studying and group work. The classroom is equipped with a video projector and a board. It is possible for science clubs and other university organizations to reserve it.

LUT Digital Library

LUT Digital Library creates the Internet access to LUT's educational and scientific resources. It is also responsible for the promotion of the documents concerning the university's history as well as the history of science and technology.

In the Digital Library users may currently find over 11 400 publications located in 10 collections:

- Journals
- History of Technology and History of LUT
- Conferences
- Patent Descriptions of LUT
- Course Books
- Didactic Materials
- Scientific Publications
- Doctoral Theses
- Student's Bookshelf

ODKRYWANIE

LUT Library's Activity

Activities, workshops, training

LUT Library conducts training concerning bibliographic research, the use of the computer catalogue and electronic sources of information (databases, journals, digital libraries, Internet).

Classes in LUT's schedule:

- Library induction - for 1st-year students
- Scientific information - for 4th-year students

Additional training:

- students and doctoral students- classes for the seminar and doctoral groups which concerns developing research skills and library offers for the specific subject or faculty
- academic and didactic staff- classes concerning the choice of information sources and skills development in their use, management of bibliography
- library staff- internal training
- foreign students- library workshops

Individual training is possible for the interested. Moreover, the library provides LUT's scholars and the library's staff with the additional training conducted by the exterior companies.

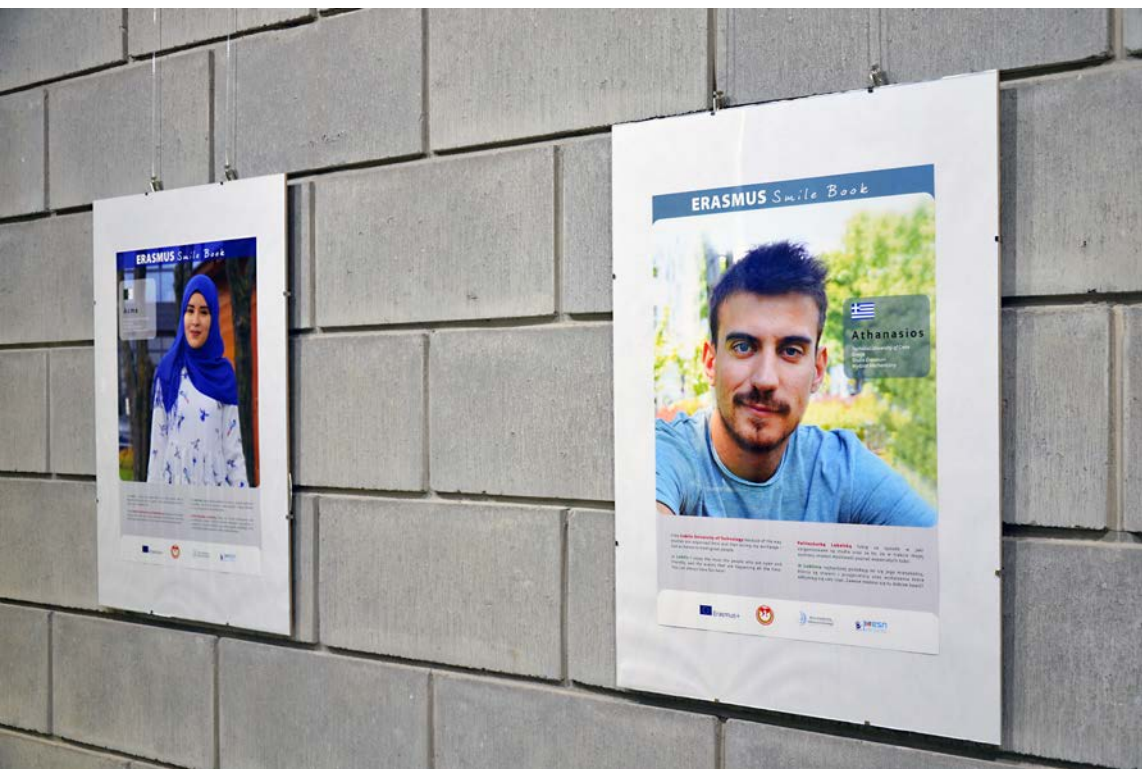

Foreign Students in LUT Library

Lublin University of Technology becomes increasingly popular with the foreign students, especially among Ukrainian and Belarus students. The university takes part in the international Erasmus + project, which results in the great number of Erasmus students from different countries.

Foreign students are provided with the necessary assistance at the Library Help Desk located at the Circulation Desk. LUT Library's staff present them the Library and assist in the use of the library resources.

Thanks to „Book a Librarian” project, foreign students may book the librarian on Friday at 9-11 a.m.

During the organized individual and group meetings students are acquainted with LUT Library's offer.

Facilities for people with disabilities

The entire library space has been adapted to the needs of people with physical disabilities.

At the entrance of the building there is the wheelchair ramp.

Moreover, LUT Library is equipped with the special devices for blind, visually impaired and deaf users, which facilitates the use of their private materials and the library resources.

Users with disabilities are also provided with the specialist computer desk located at Innovation and Advanced Technologies Centre (Nadbystrzycka 36C, level 3, room 303). The library's staff assist the users at the desk during the opening hours of the loan.

LUT Library in the community

LUT Library takes part in the numerous events organized in the region, such as Lublin Festival of Science, Book Fair, Job Fair and other events organized in Lublin and Lublin region.

It is also engaged in the organization of the annual Open Days of LUT, which is a great opportunity to promote the library among the secondary school graduates.

LUT Library Initiatives

Hobby reading

One of the LUT Library's task is the support of students' hobby reading.

The library users are provided with the numerous collection of materials shared in the reading room of Scientific Information Department.

The available materials include the current press, popular science literature as well as travel and fact literature (biographies, reportages). There is also the special collection of English literature and Polish literature in English available for the readers.

Moreover, the library organizes various events which promotes book lending among the students. One of the important initiatives of LUT Library is bookcrossing- the practice of releasing private books. The library has got special bookcrossing shelves, where students and staff may share the books with each other.

Board Game Section in the Reading Room of Scientific Information Department

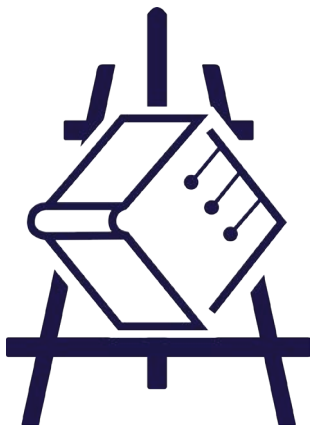

In the reading room of Scientific Information Department, the library students may find the board game section, with a great number of popular board games available for the users. Together with LUT's Pollub Gaming Society and Student Council, the library organizes the prize board game tournaments. The section is continuously improved and updated with the new games.

ość

Exhibitions in the Gallery of LUT Library

The gallery of LUT Library, located at the Centre of Advanced Technologies (level 3), presents the wide range of subjects. The main idea of the exhibitions is to display the important events connected with the university's history, technology and Lublin industry as well as the numerous passions and interests of LUT's academics and staff.

Digital Exhibitions

On the LUT Library's website, the users can find the tab of the digital exhibitions (wystawy.biblioteka.pollub.pl). It includes the photo galleries displayed during the major exhibitions, their reproductions, source and historical materials as well as photo relations from exhibition openings.
